Analysis of Organoaluminum and Organozinc Compounds, Volume 31 presents information pertinent to the organo compound of aluminum and zinc. This book discusses the growing interest in organoaluminum compounds as intermediates in the manufacture of organic chemicals.
Comprised of nine chapters, this volume begins with an overview of the methods for the determination of different functional groups and elements in organoaluminum compounds, viz. alkyle, alkozide, hydride, aluminum, halogens, amino and thio alkoxide groups. This text then explains the different solution methods of analysis of organoaluminum compounds, including various titrimetric procedures. Other chapters consider an iodometric titration method for analyzing organoaluminum compounds, which is particularly useful for rapid analysis of diluted samples. This book discusses as well the extensive work on the analysis of organoaluminum compounds by thermometric titrimetry with suitable reagents. The final chapter deals with the detailed procedures for carrying out different analyses.
This book is a valuable resource for students of analytical chemistry.
