**Essentials of Environmental Epidemiology for Health Protection: A handbook for field professionals**
Irene A. Kreis, Araceli Busby, Giovanni Leonardi, Jill Meara, Virginia Murray
Essentials of Environmental Epidemiology for Health Protection guides front line public health practitioners through the decisions they are likely to face when dealing with environmental health problems. It does this by showing how to integrate relevant aspects of environmental science, communication sciences, toxicology, and most importantly environmental epidemiology skills to conduct initial investigations which encompass all relevant issues.

The book uses a problem orientated style, using case studies, to provide practical examples of how to plan and carry out investigations or research projects. It emphasises the scoping and planning stages of a study in order to avoid common pitfalls, and includes discussions of the limitations of epidemiological studies, how to communicate with the public and funders, ethics and handling large datasets. Through the case studies the book also covers the practice of environmental public health in
developed countries.

Each chapter is written by knowledgeable practitioners in the topic, making Essentials of Environmental Epidemiology for Health Protection essential reading for all professionals in environmental public health in the UK and abroad.
