Resilience and Urban Risk Management

Resilience and Urban Risk Management

Resilience and Urban Risk Management presents the latest progress made in designing resilient towns, and identifies leads to be explored for attaining the objective of systematically integrating risks into urban environments The aim of the book is to provide guidance in designing and planning future cities, and to create a new form of risk management that does not ignore what already exists, but integrates it in the same way as if it were new.

Resilience and Urban Risk Management is of interest to academics, architects, town planners and engineers concerned with the relationship between urban projects and the various aspects of the urban resilience concept via concrete applications and methodological or historical reflections.

Damien SERRE, HDR, Professor Assistant at the Paris-Est University, EIVP, in charge of the “urban resilience” research section. The final objective of his research is to formalize knowledge useful for decision-making and helping in designing towns that are resilient when facing risks. His research is trans-disciplinary and in service of the city.

Bruno BARROCA, Architect and Professor Assistant in Urban Engineering at the Paris-Est University, a member of the urban engineering team of the LEESU laboratory (Water, Environment and Urban Systems Laboratory). His research establishes links between geography, town planning and regional development. Applications cover assessment of urban vulnerability and integration of resilience objectives in urban projects located on territories subject to natural and technological risks.

Richard LAGANIER, Professor in Geography at the Université Paris 7 Paris Diderot, Sorbonne Paris Cité, the PRODIG laboratory (Centre of Research for Organization and Distribution of Geographical Information). His research activities cover the study of relationships between risks linked with water and territories and analysis of the conditions needed for developing resilience. He is the author/co-author of a large number of works on hydrological extremes and their management.
