ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES KARUNA MOY GHOSH

This book is a comprehensive presentation of the fundamental aspects of analysis and design of steel structures. It is primarily meant for the undergraduate students of civil engineering and postgraduate students of structural engineering. It will also be immensely useful for structural engineers engaged in design, consultancy and construction involving steel structures.

The important theoretical and practical concepts which need to be assimilated prior to undertaking analysis and design—general principles and practices, functional aspects of structures, basic design concepts, alternative arrangements of equipment and service, clarity of structural behaviour, and calculations of loadings on structures—are covered in the first two chapters. The ensuing chapters provide stepwise presentation of the analysis and design procedures for various steel structures and structural elements/members on the basis of Eurocodes and British (BS) codes of practice. The three types of structures specifically covered, on the basis of functional aspects, are scrap yard structures, conveyor structural systems, and turbo-generator buildings.

In the **Second Edition**, analysis and design of steel structures have been carried out based on Indian Standard code of practice IS 800:2007. Every component of the structure comprising the beams and columns is designed in compliance with the code IS 800:2007. A comparison has been made between the results of the steel structures analysed and designed in compliance with EC3: Part 1-1 and those obtained in accordance with Indian Standard code of practice IS 800:2007.

The book discusses the various structural analyses and design calculations in an exhaustive manner. The text is illustrated with an abundant number of visuals. Important sources of information relevant to steel structures can be found in the references at the end of various chapters.

Audience

Undergraduate students of civil engineering and postgraduate students of structural engineering.

From reader reviews:

Wanda Legros:

Nowadays reading books be a little more than want or need but also get a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want attract knowledge just go with education and learning books but if you want sense happy read one with theme for entertaining for instance comic or novel. Typically the ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES is kind of publication which is giving the reader unstable experience.

Peter Pitts:

This ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES are usually reliable for you who want to be described as a successful person, why. The reason of this ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES can be on the list of great books you must have will be giving you more than just simple examining food but feed you with information that probably will shock your earlier knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed kinds. Beside that this ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES forcing you to have an enormous of experience for instance rich vocabulary, giving you test of critical thinking that we understand it useful in your day pastime. So , let's have it and luxuriate in reading.

Teresa Hunter:

Beside this kind of ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you will got here is fresh through the oven so don't end up being worry if you feel like an previous people live in narrow community. It is good thing to have ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES because this book offers to you readable information. Do you often have book but you don't get what it's all about. Oh come on, that would not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. Techniques you still want to miss the idea? Find this book as well as read it from right now!

Mildred Lucas:

Is it anyone who having spare time subsequently spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This ANALYSIS AND DESIGN PRACTICE OF STEEL STRUCTURES can be the answer, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these books have than the others?
