Government for a new age (Thinkers 50 Books) Michel Khoury, Rabih Abouchakra
What is the role of government in the modern world?

The environment that governments operate in today is hugely complex. Governments face difficult challenges on all sides. Global upheavals and geopolitical shifts, climate change, rapidly evolving technologies and socio-economic demographics, resource constraints, an increasingly diverse constituency and citizens' more demanding expectations -- these are just some of the forces driving societal changes and transforming the context in which governments operate.
Around the world governments are responding to these challenges by shifting the way they think, steer, organize, measure and engage with citizens, and the private and third sector.
Until now, though, best practice has remained elusive. Intergovernmental collaboration and sharing of innovative policymaking is piecemeal.

Government for a New Age brings together the latest thinking on modern government. It sheds light on the current trends in governance practices, operating models, processes and tools that leading governments are embracing.

Government for a New Age explores the ways in which governments are changing their value proposition to tackle these pressing concerns and provide some answers to these questions.
