Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies Yasuo Yamane, Tom Childs

Based on a bestselling book originally published in Japanese, **Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies** offers time-tested methods and little-known tips for achieving successful transfer of technology along with the skills required to operate that technology. Designed to support a series of lectures on technology transfer within a master's course on the management of technology, it presents the results of years of research carried out at Hiroshima University.

The book delves into the authors' decades of experience transferring technology between Japan and the rest of the world, particularly to developing countries from where much of the world's future economic growth is expected. It contains case studies of successful technology transfers from both the ship building and food equipment industries. Its wide-reaching coverage examines methods of skill transfer, production management, and manufacturing company classification.

Introducing readers to the engineering activities that occur within the manufacturing industry, the book illustrates the engineering technology activities involved in manufacturing, along with the production management activities required to support them. It also explains how job simulators can help shorten learning times in the manufacturing industry in the same way that flight simulators are used to teach flying skills to pilots.

The book outlines a framework for teaching and learning processes that can be visualized in terms of an S-shaped learning curve. It explains how technology transfer overseas should be supported by contractual agreements between the parties concerned. Detailing the legal/contractual responsibilities for all parties involved, it also describes what you should do if problems arise during the transfer.

Integrating previously unpublished research results with illustrative case studies, this book is suitable for a wide audience within the manufacturing industry—including manufacturing engineering students in both developed and developing countries, those responsible for the development of manufacturing engineers in industry and elsewhere, and anyone interested in the international activities of Japanese manufacturing companies.

From reader reviews:

Ward Bishop:

What do you ponder on book? It is just for students as they are still students or it for all people in the world, what the best subject for that? Merely you can be answered for that concern above. Every person has various personality and hobby for each and every other. Don't to be pushed someone or something that they don't wish do that. You must know how great along with important the book Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies. All type of book is it possible to see on many resources. You can look for the internet options or other social media.

Steven Purdy:

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what you problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is make you feel bored faster. And you have time? What did you do? All people has many questions above. They need to answer that question since just their can do that. It said that about e-book. Book is familiar on every person. Yes, it is proper. Because start from on jardín de infancia until university need this kind of Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies to read.

Franklin Richter:

Exactly why? Because this Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will shock you with the secret it inside. Reading this book beside it was fantastic author who write the book in such remarkable way makes the content interior easier to understand, entertaining means but still convey the meaning completely. So , it is good for you for not hesitating having this nowadays or you going to regret it. This book will give you a lot of rewards than the other book have got such as help improving your skill and your critical thinking means. So , still want to hesitate having that book? If I had been you I will go to the publication store hurriedly.

Vincent Mickens:

Are you kind of active person, only have 10 as well as 15 minute in your day to upgrading your mind expertise or thinking skill even analytical thinking? Then you are having problem with the book when compared with can satisfy your short space of time to read it because all of this time you only find publication that need more time to be learn. Manufacturing Technology Transfer: A Japanese Monozukuri View of Needs and Strategies can be your answer given it can be read by anyone who have those short free time problems.
