Javascript + CSS + DOM: Desenvolvimento para Web (Portuguese Edition)

Itamar Pena Nieradka

Javascript + CSS + DOM: Desenvolvimento para Web (Portuguese Edition) Itamar Pena Nieradka
O desenvolvimento para sistemas no ambiente web cresce a cada dia. Mais e mais pessoas estão aderindo ao uso da Internet para realizar compras, consultar mercadorias e realizar transações bancárias. Tais sistemas são possíveis pelo avanço das tecnologias envolvidas na criação de sistemas para Internet, entre estas tecnologias estão o CSS e o DOM e como base de tudo o HTML.

Com CSS (Cascade Style Sheet), é possível personalizar, decorar e tornar as páginas muito mais atraentes além de permitir ao desenvolvedor separar o seu código deixando HTML para moldar o site e o CSS apenas para enfeitar e dar aquele toque especial.

Com DOM (Document Object Model), é possível manipular os elementos HTML em tempo real, permitindo criar ou remover elementos do site pelo próprio visitante. Outra vantagem é que para o programador o acesso às propriedades dos elementos se torna muito mais clara.

O Javascript é a linguagem que torna os sites dinâmicos, permitindo ao usuário maneiras de interagir com a página e, ao programador, permite utilizar recursos que não são possíveis apenas com HTML ou CSS como, por exemplo, interação com o sistema do computador para apresentar data e hora.

Este livro apresenta estas tecnologias que são fundamentais para quaisquer pessoas que desejem aprender ou aprimorar a criação de sistemas para Internet.
