Zach Shelby, Carsten Bormann

6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) Zach Shelby, Carsten Bormann
"It is stunningly thorough and takes readers meticulously through the design, con?guration and operation of IPv6-based, low-power, potentially mobile radio-based networking." Vint Cerf, Vice President and Chief Internet Evangelist, Google

This book provides a complete overview of IPv6 over Low Power Wireless Area Network (6LoWPAN) technology

In this book, the authors provide an overview of the 6LoWPAN family of standards, architecture, and related wireless and Internet technology. Starting with an overview of the IPv6 ‘Internet of Things’, readers are offered an insight into how these technologies fit together into a complete architecture. The 6LoWPAN format and related standards are then covered in detail. In addition, the authors discuss the building and operation of 6LoWPAN networks, including bootstrapping, routing, security, Internet ingration, mobility and application protocols. Furthermore, implementation aspects of 6LoWPAN are covered.

Key Features:

- Demonstrates how the 6LoWPAN standard makes the latest Internet protocols available to even the most minimal embedded devices over low-rate wireless networks
- Provides an overview of the 6LoWPAN standard, architecture and related wireless and Internet technology, and explains the 6LoWPAN protocol format in detail
- Details operational topics such as bootstrapping, routing, security, Internet integration, mobility and application protocols
- Written by expert authors with vast experience in the field (industrial and academic)

6LoWPAN: The Wireless Embedded Internet is an invaluable reference for professionals working in fields such as telecommunications, control, and embedded systems. Advanced students and teachers in electrical engineering, information technology and computer science will also find this book useful.

From reader reviews:

Vivian Obrien:

Book is written, printed, or created for everything. You can realize everything you want by a publication. Book has a different type. As we know that book is important matter to bring us around the world. Alongside that you can your reading skill was fluently. A e-book 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) will make you to possibly be smarter. You can feel more confidence if you can know about anything. But some of you think that open or reading a new book make you bored. It is not make you fun. Why they could be thought like that? Have you seeking best book or acceptable book with you?

Amber Payne:

Nowadays reading books become more than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The data you get based on what kind of reserve you read, if you want send more knowledge just go with training books but if you want truly feel happy read one with theme for entertaining like comic or novel. The particular 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) is kind of publication which is giving the reader unforeseen experience.

Ruth Hill:

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book method, more simple and reachable. This specific 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) can give you a lot of pals because by you checking out this one book you have thing that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than different make you to be great folks. So , why hesitate? Let's have 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems).

Jesus Moreno:

A number of people said that they feel weary when they reading a reserve. They are directly felt it when they get a half parts of the book. You can choose the book 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) to make your own reading is interesting. Your own personal skill of reading skill is developing when you like reading. Try to choose easy book to make you enjoy to see it and mingle the idea about book and reading especially. It is to be initial opinion for you to like to open up a book and study it. Beside that the publication 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) can to be your brand new

friend when you're experience alone and confuse with the information must you're doing of that time.
