Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series)

Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series)

This book examines how individuals behave across time and to what degree that behavior changes, fluctuates, or remains stable.

It features the most current methods on modeling repeated measures data as reported by a distinguished group of experts in the field. The goal is to make the latest techniques used to assess intraindividual variability accessible to a wide range of researchers. Each chapter is written in a "user-friendly" style such that even the "novice" data analyst can easily apply the techniques.

Each chapter features:

- a minimum discussion of mathematical detail;
- an empirical example applying the technique; and
- a discussion of the software related to that technique.

Content highlights include analysis of mixed, multi-level, structural equation, and categorical data models. It is ideal for researchers, professionals, and students working with repeated measures data from the social and behavioral sciences, business, or biological sciences.

From reader reviews:

Mary Flynn:

Here thing why this Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series) are different and trustworthy to be yours. First of all studying a book is good however it depends in the content of the usb ports which is the content is as delicious as food or not. Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series) giving you information deeper including different ways, you can find any book out there but there is no publication that similar with Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series). It gives you thrill studying journey, its open up your eyes about the thing that happened in the world which is maybe can be happened around you. You can easily bring everywhere like in area, café, or even in your method home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series) in e-book can be your substitute.

Donald Lewis:

This book untitled Modeling Intraindividual Variability With Repeated Measures Data: Methods and Applications (Multivariate Applications Series) to be one of several books that will best seller in this year, that's because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this kind of book in the book store or you can order it via online. The publisher on this book sells the e-book too.
