Targeted Therapies in Breast Cancer (Oxford American Pocket Notes)

Harold Burstein

Targeted Therapies in Breast Cancer (Oxford American Pocket Notes) Harold Burstein
The development of monoclonal antibodies and other inhibitors of specific molecules, fully utilizing the insights learned from molecular techniques such as comparative microarrays and protein expression patterns, has led to the development and FDA approval of several agents for the treatment of breast cancer, such as trastuzamab (Herceptin, targeting HER-2 positive tumors) and lapatinib (Tykerb, targeting tumors with mutated/overexpressed EGFR 1 and 2). Other agents specifically targeting the estrogen receptor, the aromatose pathway and microtubule dynamics, fulvestrant (Faslodex, targeting the ER specifically in breast cancer cells), and letrozole (Femara, targeting the aromatose pathway), raloxifene (Evista, a selective estrogen receptor modulator), ixabepilone (Ixempra, a ?-tubulin inhibitor) have also been approved for various stages and specific settings in breast cancer treatment. The current challenges in the field include further targeting of these agents as part of specific strategies for each patient (biomarker testing, pharmacogenetics, etc.), as well as follow-up and management of adverse events.
Part of the Oxford American Pocket Notes series, this volume provides clinicians with the ultra-concise, evidence-based, current information and insight on implementing the latest treatment strategies, including targeted agents, into clinical practice. This portable volume is intended to provide quick, easily accessible guidance for the practicing oncologist, oncology care staff (including nurses and PAs) as well as the primary care practitioner, on the mechanism of action, dosing and administration and adverse effects of the approved targeted agents.

From reader reviews:

Patricia White:

Reading a publication tends to be new life style in this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Using book everyone in this world can easily share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their particular reader with their story as well as their experience. Not only the story that share in the guides. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write on their book. One of them is this Targeted Therapies in Breast Cancer (Oxford American Pocket Notes).

Rosemarie Pickett:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you might have done when you have spare time, and then why you don't try issue that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Targeted Therapies in Breast Cancer (Oxford American Pocket Notes), you could enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't buy it, oh come on its named reading friends.

Linda Livingston:

Your reading sixth sense will not betray you actually, why because this Targeted Therapies in Breast Cancer (Oxford American Pocket Notes) publication written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your personal hunger then you still question Targeted Therapies in Breast Cancer (Oxford American Pocket Notes) as good book not simply by the cover but also through the content. This is one book that can break don't evaluate book by its handle, so do you still needing yet another sixth sense to pick this!? Oh come on your reading through sixth sense already told you so why you have to listening to a different sixth sense.

David Perrin:

Reading a book make you to get more knowledge from that. You can take knowledge and information from a book. Book is written or printed or highlighted from each source that filled update of news. On this modern era like now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the Targeted Therapies in Breast Cancer (Oxford American Pocket Notes) when you needed it?
