The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry Fazale Rana
The scientific evidence of design just got stronger.

Armed with cutting-edge techniques, today's biochemists have uncovered startling molecular features inside the cell that can compel only one reasonable conclusion--a supernatural agent must be responsible for life.

Destined to be a landmark apologetic work, *The Cell's Design* explores the scientific and theological impact of these discoveries. Instead of focusing on the inability of natural processes to generate life's chemical systems (as nearly all apologetics works do), Fazale Rana makes a positive case for life's supernatural origin by highlighting the many biochemical features that reflect the Creator's signature.

This breakthrough book extends the case for design beyond irreducible complexity. These never-before-discussed evidences will evoke awe and amazement at God's creative majesty in the remarkable elegance of the cell's chemistry.

"In Darwin's day, a living cell was thought to be quite simply--for all practical purposes--little more than a microscopic blob of gelatin. Rana lays out what contemporary science has learned about the cell's design, and he poignantly and provocatively shows that it is the handiwork of not only an Intelligent Designer but specifically the God revealed in Scripture."--Hank Hanegraaff, president, Christian Research Institute; host, *Bible Answer Man* broadcast

"Fazale Rana's welcome sequel to *Origins of Life* makes a significant contribution to the growing scientific literature pointing to intelligent design."--Kenneth Boa, president, Reflections Ministries

Fazale Rana is vice president of research and apologetics at Reasons To Believe. He is the coauthor, with Hugh Ross, of *Origins of Life* and *Who Was Adam?*

From reader reviews:

Ramona Johnson:

Do you have favorite book? In case you have, what is your favorite's book? E-book is very important thing for us to be aware of everything in the world. Each book has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their time for you to read a book. They may be reading whatever they consider because their hobby is reading a book. Why not the person who don't like examining a book? Sometime, particular person feel need book after they found difficult problem or even exercise. Well, probably you will require this The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry.

Martin Song:

What do you about book? It is not important to you? Or just adding material when you want something to explain what the ones you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make one feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They must answer that question mainly because just their can do which. It said that about publication. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need this particular The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry to read.

Richard Diller:

Information is provisions for folks to get better life, information currently can get by anyone at everywhere. The information can be a information or any news even a problem. What people must be consider whenever those information which is inside the former life are difficult to be find than now could be taking seriously which one works to believe or which one often the resource are convinced. If you have the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen throughout you if you take The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry as your daily resource information.

Sandra Brown:

Don't be worry when you are afraid that this book can filled the space in your house, you can have it in e-book way, more simple and reachable. This specific The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry can give you a lot of friends because by you taking a look at this one book you have factor that they don't and make anyone more like an interesting person. That book can be one of one step for you to get success. This reserve offer you information that perhaps your friend doesn't realize, by knowing more than different make you to be great men and women. So , why hesitate? We need to have The Cell's Design (Reasons to Believe): How Chemistry Reveals the Creator's Artistry.
