Statistics for Nursing Research: A Workbook for Evidence-Based Practice Susan K. Grove, Daisha J. Cipher

Understand the statistical methods used in nursing research articles! **Statistics for Nursing Research: A Workbook for Evidence-Based Practice, 2nd Edition** helps you interpret and analyze the statistical data found in health sciences research articles. Practical exercises show how to critically appraise sampling and measurement techniques, evaluate results, and conduct a power analysis for a study. Written by nursing statistics experts Susan Grove and Daisha Cipher, this is the only statistics workbook for nursing to include research examples from both nursing and medical literature for a complete perspective on health sciences research.

- **Comprehensive coverage** includes exercises that address all common techniques of sampling, measurement, and statistical analysis that you are likely to see in nursing and medical literature.
- **A literature-based approach** incorporates a relevant research article into each exercise/chapter, with key excerpts.
- **45 sampling, measurement, and statistical analysis exercises** provide a practical review of both basic and advanced techniques, and prepare you to apply statistics to nursing practice.
- **Consistent format** for all chapters facilitates quick review and easier learning, covering the statistical technique in review, results from a research article, and study questions.
- **Study questions** in each chapter help you apply concepts to clinical practice.
- ***Questions to Be Graded* in each chapter may be completed and submitted online, to assess your mastery of key statistical techniques.**
- **A concise index** makes it easy to locate information quickly.

- **NEW examples** show the latest, high-quality research studies.
- **NEW! Expanded coverage** helps undergraduate students apply the information learned in statistics and research courses, serves as a refresher/review for graduate students, and also helps in critically appraising studies to determine whether their findings may be used in evidence-based practice.
- **NEW! *Understanding Statistical Methods* section** includes exercises to help in understanding the levels of measurement (nominal, ordinal, interval, and ratio) and in appraising the samples and measurement methods in studies.
- **NEW! *Conducting and Interpreting Statistical Analyses* section** includes exercises to help in understanding the power analysis and how to conduct a power analysis for a study, showing how to determine the most appropriate statistical method(s) for analyzing data for a class project, for a clinical agency project, or for an actual research study.
- **NEW! Answers to study questions** are located in the back of the book.
