Toby Boudreaux

PHP 5: Your visual blueprint for creating open source, server-side content Toby Boudreaux
* Now revised to cover features found in PHP4 and PHP5, this new edition shows Web developers step by step how to create dynamic, data-driven Web applications
* Two-color screen shots accompanied by concise callouts demonstrate how to tackle more than 100 key PHP tasks, including using cookies to monitor the activity of Web site visitors, retrieving information from MySQL or other databases, creating images and Web pages on the fly, and processing XML documents
* Shows how to use PHP with Apache Web server, process data forms, access data files, troubleshoot PHP scripts, and migrate scripts to PHP5
* A companion Web site features a fully searchable e-version of the book, plus all code that appears in the text-ready to plug into users' Web pages

From reader reviews:

James Stumbaugh:

Reading a reserve tends to be new life style with this era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world could share their idea. Guides can also inspire a lot of people. A lot of author can inspire their own reader with their story or even their experience. Not only situation that share in the publications. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors on this planet always try to improve their ability in writing, they also doing some investigation before they write with their book. One of them is this PHP 5: Your visual blueprint for creating open source, server-side content.

Martin Song:

People live in this new day time of lifestyle always make an effort to and must have the spare time or they will get lot of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to a person of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, typically the book you have read is usually PHP 5: Your visual blueprint for creating open source, server-side content.

April Harry:

You may spend your free time to see this book this reserve. This PHP 5: Your visual blueprint for creating open source, server-side content is simple bringing you can read it in the park, in the beach, train along with soon. If you did not get much space to bring the particular printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Thomas Crittenden:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from the book. Book is created or printed or outlined from each source in which filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book.
