Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology)

Jürg Müller

Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology) Jürg Müller
Most of our knowledge of the physiological control of aldosterone secretion is based on animal experiments and clinical studies which were carried out in the 1950s and early 1960s by a large number of inspired, ingenious and meticulous researchers. Their work has been excellently reviewed by-among others-MULLER (1963), BLAIR WEST et al. (1963), LARAGH and KELLY (1964), GANONG et al. (1966), MULROW (1966), DAVIS (1967) and GROSS (1967). According to the majority of these investigators, aldosterone secretion is primarily regulated by the renin-angiotensin system, with plasma sodium and potassium levels and pituitary secretion of ACTH playing important secondary roles. During the last six years, this hypothesis has been generally accepted and has only occasionally been challenged. The following is an attempt to take-from the perspective of a relatively simple in vitro model-a new look at the efferent axis of the apparently very complex control system maintaining adequate aldosterone production in the mammalian organism. My views are based mainly on a series of experiments which I have performed in order to study more closely the interactions of adrenocortical tissue with substances capable of directly influencing aldosterone bio synthesis.

From reader reviews:

Catherine Scott:

Nowadays reading books are more than want or need but also be a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The information you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want feel happy read one having theme for entertaining like comic or novel. Often the Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology) is kind of book which is giving the reader erratic experience.

Myrtle Brown:

People live in this new day of lifestyle always try and and must have the time or they will get lot of stress from both way of life and work. So , whenever we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity do you possess when the spare time coming to you of course your answer may unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, the book you have read is usually Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology).

Gary Ritchie:

Your reading sixth sense will not betray a person, why because this Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology) publication written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology) as good book not merely by the cover but also by content. This is one reserve that can break don't ascertain book by its deal with, so do you still needing another sixth sense to pick this!? Oh come on your reading sixth sense already said so why you have to listening to one more sixth sense.

John Martin:

A lot of e-book has printed but it differs. You can get it by online on social media. You can choose the most effective book for you, science, comedian, novel, or whatever simply by searching from it. It is known as of book Regulation of Aldosterone Biosynthesis (Monographs on Endocrinology). You'll be able to your knowledge by it. Without leaving behind the printed book, it could possibly add your knowledge and make an individual happier to read. It is most crucial that, you must aware about publication. It can bring you from one spot to other place.
