The Math of Christ

Stephen Bauer

The Math of Christ Stephen Bauer
All the Rabbis have been wrong for 2,000 years. The Math of Christ uses the fundamental tenets of science to prove conclusively that Jesus Christ fulfilled the prophecies about the coming Messiah for all people. Predictions written centuries before the birth of Christ describe how man can identify the only valid offer of salvation and eternal life for all mankind. True Christians already possess sufficient faith in Christ as the Messiah. This book is written for those technical people and children whose faith may be challenged by science taught in public schools. The Math of Christ will show you how the odds of forty prophecies about the Messiah could not possibly have happened by accident, but rather had to have been the result of a purposeful design. The Father of Mathematical Probability, Dr. Emil Borel confirms that these events were no grand coincidence. Readers will also discover how many other prophecies in the Bible have already come true, how the Bible is full of science knowledge revealed centuries before man actually discovered these facts, how the Earth was made specifically for man to live in and how life would be impossible if very minor changes were made in its existence. Every Christian will want to read The Math of Christ to strengthen their own faith. They will also want a copy for every person they have tried to witness to and reach.
